## ANNOUNCEMENT

- 2 Message from the President**  
Prof. Le Vinh Danh

## EDITORIAL

- 3 Editorial Foreword**  
Prof. Václav Snášel

## ARTICLES

- 4 Modelling of Graph Databases**  
Jaroslav Pokorny
- 18 Application of extended Kalman filtering for estimating immeasurable vehicle state variables**  
Anh-Tuan Le
- 29 Multi-criteria analysis and prediction of network incidents using monitoring system**  
Lukas Macura and Miroslav Voznak
- 39 An effective approach of approximation of fractional order system using real interpolation method**  
Quang Dung Nguyen
- 48 Differential evolution dynamics analysis using aggregated networks**  
Lenka Skanderova and Ivan Zelinka
- 61 On the convergence of bounded solutions of non-homogeneous gradient-like systems**  
Minh-Phuong Tran and Thanh-Nhan Nguyen
- 68 Chaos-based optimization – A review**  
Roman Senkerik, Ivan Zelinka, and Michal Pluhacek
- 80 Adaptive MIMO controller design for chaos synchronization in coupled Josephson junctions via fuzzy neural networks**  
Tat-Bao-Thien Nguyen
